1   ABSTRACT OF THE DISCLOSURE

2

3   Disclosed is a method and system for generating a graphical output display of a

4   family tree and a graphical output display of a chronological timeline, which are

5   displayed in conjunction with each other. The result is an aesthetically pleasing

6   display, including family member names and dates, as well as colorful images,

7   photographs of family members, and photographs of significant people and events

8   that have taken place at specific dates on the timeline. Dates on the family tree

9   output are synchronized with the dates on the chronological time line.
